

# Transparent Card Checklist & Set up Four Colour Process + White

White Ink Plate

Black line is bleed size 92x56mm. Please make sure all objects are within this area.  
We cannot print if there is anything larger then this area.

Pink line is finished size 90x54mm

Blue line is safe area. 84x48mm

We recommend to have all important text, images etc inside this area.

## Creating Areas that you would like to be white, or have white underneath

When creating your white ink plate, duplicate the card below and set the areas you want to be printed white to 100K, this is so we can create the plates when doing the white areas.  
If there are white areas left on the design, these areas will become transparent.

### Check List

1. All Dimensions need to be correct to the above description.
2. File needs to be in CMYK.
3. Make sure all fonts are outlined.
4. Check that images are 300dpi or above and that they are embedded NOT linked.
5. If there are black colours, select them to make sure they are not photoshop black. C75 M68 Y67 K90 is photoshop black if colours are simlair to this please change to be a solid mix of C30 M30 Y30 K100. This will give you a rich black.
